ROAD MARKING SYSTEMS

	H9-1
Technical Data:	
Engine	1-cylinder 390 cm³, Honda gasoline engine, air-cooled, 8,4 kW at 3.200 rpm
Drive	hydraulically infinitely adjustable
Air output	up to 670 l/min (2-cylinder compressor)
Dimensions (L x W x H)	1.650 x 1.050 x 1.220 mm
Weight approx.	255 - 285 kg
Application method / Container volume:	
Cold Paints	Airspray (Low Pressure Method) up to 48 l (1 container) or 2 x 24 l (2 container)
Characteristics:	
Vibration isolation for engine/compressor unit	yes
Fixing for marker unit right and left side	yes
Uniform line widths, even in tight bends	yes
Straight-run fixing device for rear wheel in order to maintain direction easily	yes
Material container with manual agitator	yes
Pressurised glass bead container	yes
Line width (dependent on material and equipment)	10 - 60 cm
Options:	
Line gap electronic	electronic
Can be equipped with additional hand spray gun	yes
Use of commercial paint buckets as an insert container	30 l
Sports facility execution	-
Trailer with driver seat	yes
